

autumn's autumnal autumnites
I can see their embery fires
and smell the dryness of the air.

fall's falling fallers
I almost fell from a window
on the breezy street.
but then againnnnnnnnn

where do their fires spread?
why open new fields and rural churchyards?
when will the newly old leaves fall?

in autumnnnnnnnn, in fall.....

haiarite:

only forty hells
burn
as brightly as
this one.

This one:

my tooth aches
ache
but none so badly as

Haiarite.
